Garage Management System

The Garage Management System is a valuable tool for automotive repair facilities, helping them deliver top-notch service, increase operational efficiency, and build lasting customer relationships. With its user-friendly interface and powerful features, GMS empowers garages to thrive in a competitive market while ensuring a seamless and satisfying experience for both customers and staff.
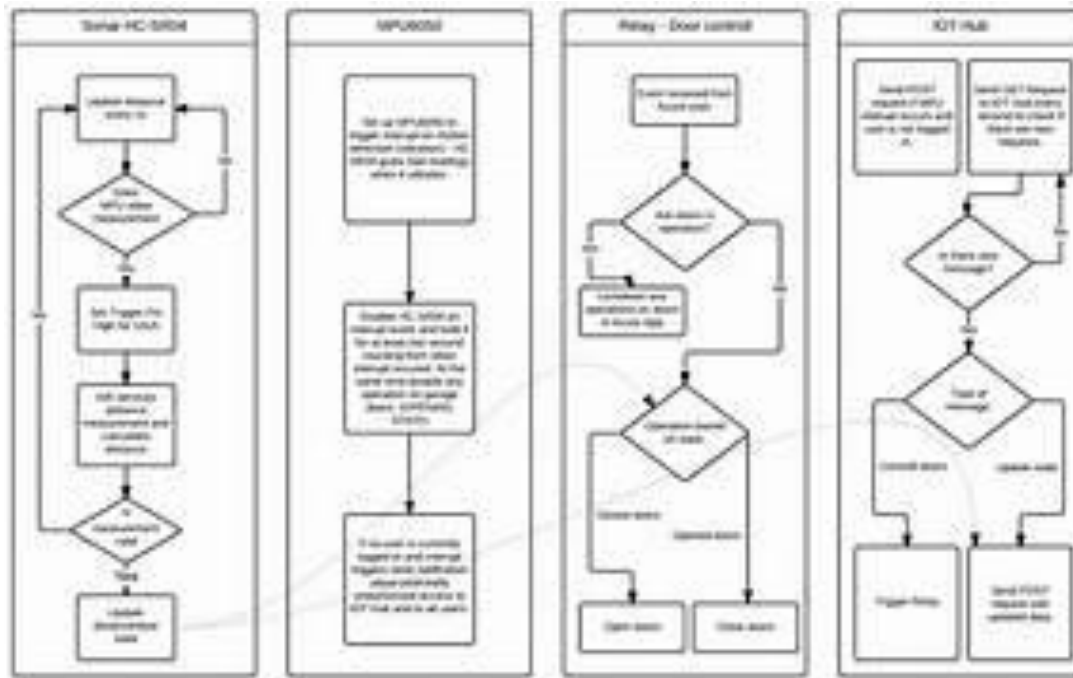

System Architecture

The system is a web-based application where customers can book services, track repair progress, and receive invoices. Admins can manage mechanics, spare parts, and customer data through a dashboard. Data is stored in a database, and the system runs on a cloud server for better scalability and performance.
